# The World's First Bluetooth Truck Alignment System

## 4 MINUTE MEASUREMENT First Two axles Included

1

### Select vehicle from the database

- Updatable database of trucks, RV's, and busses.
- Input your own data if desired.

2

### Install patented Non-Runout Fast-Clamp

- Fits Budd type wheels.
- Securely fastens by gripping tire.
- References wheel at its center for precise accuracy.
- Raising the vehicle for runout compensation is not necessary or recommended.
- Skip runout and save significant time and increase your labor efficiency.

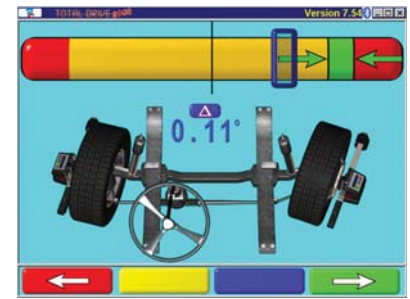

## Precision Accuracy with Speed and Simplicity

### MEASUREMENTS Including Caster and SAI

4

### Measure Angles for Vehicle Diagnosis

- Front and rear camber and toe with thrust are measured automatically.
- Caster and SAI turning routine requires less than 10 seconds.
- Complete diagnosis is displayed for both axles.

3

### Install Wireless Sensors

- BlueTooth Communication provides the fastest and most secure data transfer without wires, receivers, or antennas. Our communication is so stable that no back-up cables are included or needed.
- Operate the alignment program from any sensor head. Control panel on each head eliminates the need to walk back and forth to the console.
- Precision accuracy due to our CCD measuring system.

# Bluetooth Truck Aligners

## TOTAL DRIVE 8 SERIES

### Model TD8080T BTH

#### Standout Features

- Bluetooth Wireless Data Transmission.
- 8 camera, 360 degree measuring.
- Non runout 3 point wheel clamps.
- Premium cabinetry with head charging.
- Lightweight (8 lb.) sensor heads.
- Printer, 19" LCD display, keyboard.
- Data filing stores millions of printouts.
- Premium software including help images, trailer program, multi axles, busses and coaches, and light trucks.
