Complete Calibration Package Includes Calibration Frame Package + LDW Calibration Package

AVM - RCW - BSD - NV Calibration - Part #ADASCOMPLETE

- Does the MSADAS tablet provide other scan tool functions than ADAS calibration?
 - Yes, the MSADAS provides all the same diagnostic and maintenance services as the MS908SP, including Pre / Post Scanning
- Can I purchase just the ADAS application upgrade without the calibration frame to complete ADAS calibration procedures?
 - No, the MaxiSYS ADAS application requires a code (QR code scan) from the calibration frame to activate the software.
- Can I activate multiple tool ADAS applications from one calibration frame?
 - No, the activation "bonding" is unique to a single ADAS application tool from the Autel ADAS calibration frame.
 - You can use an "activated" ADAS application tool with any Autel ADAS calibration frame.
